CRM Standalone	\$94	\$87	\$80	n/a

What is a Contact Center?	What is CRM?
<b>Contact Management</b> <ul style="list-style-type: none"> <li>A group of representatives or 'agents' addressing 'customer' interactions where the calls and/or other media route to the 'most available' agent for handling</li> </ul>	<b>"Citizen / Customer Relationship Management"</b> <ul style="list-style-type: none"> <li>For candidates, students, faculty, municipalities, agencies, companies, or organizations with which you maintain a relationship</li> </ul>
<b>Computer Telephony Integration (CTI) applications</b> <ul style="list-style-type: none"> <li>Screen and data synchronization also called 'screen-pop' with Oracle CRM On Demand</li> </ul>	<b>Tracking</b> <ul style="list-style-type: none"> <li>Of customer requests, call service requests; maintain an audit trail of all work performed</li> </ul>
<b>Business Rule Routing</b> <ul style="list-style-type: none"> <li>Calls and/or other media can be processed or handled based on specific business rules such as time of day, agent abilities (skill sets) or caller selections</li> </ul>	<b>Reporting</b> <ul style="list-style-type: none"> <li>Manager and executive level insight into key business processes</li> </ul>
<b>Real-Time Views</b> <ul style="list-style-type: none"> <li>Manager and contact center agents can have real-time views of center statistics like number of calls holding, length of call hold times and service levels</li> </ul>	<b>Can roll out quickly to manage basic business processes</b> <ul style="list-style-type: none"> <li>Marketing Programs</li> <li>General Information Centers</li> <li>Complaint Lines</li> </ul>
<b>Reporting</b> <ul style="list-style-type: none"> <li>Manager has the ability to report on individual agent or group performance hourly, daily, weekly, monthly and annually</li> </ul>	<b>Can integrate with other systems to manage additional business processes</b> <ul style="list-style-type: none"> <li>Application processing</li> </ul>
<b>Multiple Solutions Based on Needs</b> <ul style="list-style-type: none"> <li>The introduction of sophisticated routing, reporting and recording differentiates a Contact Center from ACD</li> <li>Adding different media other than voice differentiates a Voice Agent from a Multimedia Agent</li> </ul>	<b>Can roll out in phases focusing on:</b> <ul style="list-style-type: none"> <li>Simple business process first, then more complex</li> <li>Single department first, then additional departments</li> <li>Call takers first, then back-office staff</li> </ul>

What are the Benefits of ACD and Contact Center Applications?	What are the benefits of CRM?
<b>Enhanced caller experience &amp; increased customer service levels</b> – calls are routed most effectively to the best possible agent	<b>Improves customer satisfaction</b> by enabling resolution on the first call / interaction
<b>Equitably allocates contacts</b> between agents which enhances job satisfaction	<b>Improves organizational efficiency</b> by shifting work to staff best able to perform it
<b>Increases visibility</b> to services levels and performance with ability to route multimedia applications the same as voice – Web Chat, Email or Fax	<b>Enables teamwork</b> by providing an integrated view of the customer (e.g., service requests, notes, emails, inbound and outbound phone calls, attachments)
<b>Web-based reporting tools</b> provide managers and supervisors visibility to real-time service statistics and historical performance	<b>Improves efficiency of your organization</b> by standardizing business processes through workflow
<b>Actionable management tools</b> to modify routing in real-time for changes or adverse scenarios	<b>Allows managers and executives to measure improvements in customer service</b> with reporting that measures performance against established Service Level Agreements (SLA)
